DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-9, 11-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Graham et al (United States Patent No. 5,177,694).

Graham et al disclose a method for restoration of a patients tooth comprising generating a color image of the patient's tooth with a digital camera, such as a Canon RC-250, and forwarding the electronic image to a dental laboratory where it is evaluated by the technician and feedback given. Regarding claim 2, the dentist forwards with the photo the type of restoration to be manufactured, which constitutes "a preliminary treatment plan".

Art Unit: 3732

Claims 1-37 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Morris et al (United States Patent No. 6,190,170 cited by applicant).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 18-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Graham et al.

Graham et al disclose the invention essentially as claimed except that the image is sent via courier on a diskette rather than sent by direct computer link or e-mail. It would have been obvious to one skilled in the art to send the electronic image via direct computer link or email rather than on a diskette by courier in order provide quicker delivery thereof to the laboratory.
